

Sexual Health GP Consultation

For people with a specific symptom of concern

Our 30 minute Sexual Health GP Consultation offers you the chance to discuss any STI symptoms or concerns directly, with one of our friendly GPs.

The consultation includes:

- ✓ Time to discuss any symptoms or concerns
- ✓ A private prescription if required (medication not included)
- ✓ Diagnostic tests, available at additional cost
- ✓ Onward referral to a specialist if required
- ✓ A clinically relevant examination if required

What happens at the GP appointment?

1. Before the appointment you'll receive a link to a pre-appointment questionnaire. Please complete this as accurately as you can.

2. When you arrive at our centre, our team will welcome you and guide you to where to wait for your appointment.

3. One of our Bupa GPs will then take you through to a private room where they will talk you through any concerns.

4. If any of your results are positive, you will be booked in for a consultation with one of our GPs. The GP will discuss any tests that may be required or next steps.

Bupa Sexual Health services are only available to UK residents aged 18 and over. Subject to availability.
