Assisted Fertility.
The perfect addition to our family of benefits.
Meet a growing need

1 in 4 chance of heterosexual couples conceiving naturally if they've been trying for more than three years without success

1 in 7 heterosexual couples are estimated to be affected by infertility issues

1 in 7 heterosexual couples are estimated to be affected by infertility issues

*nhsex, 2020

From 2008 to 2018 patients in female same-sex relationships using IVF increased by 672%

More and more people are now seeking help to conceive.

How we can help

A £15,000 lifetime allowance for each person or couple, covering the resources and support needed to help increase their chances of conception.

Infertility can have a big impact on mental health. Employees can always turn to us for advice or a listening ear, and with our market leading mental health cover, we’ll guide them to the right support.

*£15,000 available per lifetime, whether accessed as an individual or couple (if both are named on the policy).

**As of August 2022, this comparison to other products in the market is based on Bupa’s and Defaqto’s interpretation of the differences between Bupa's Corporate Select Product and other health insurance products offering mental health cover. The comparison excludes any special offers or promotions which may temporarily alter the cover offered. Cover comparison information is for personal use and guidance only and does not constitute any contractual representation, warranty or obligation by either Bupa or Defaqto about the completeness, accuracy, reliability, suitability or availability of the comparison. Neither party accepts any liability for errors, omissions, direct or consequential loss in relation to this comparison.
In collaboration with market leaders

CARE Fertility UK
The largest independent provider of fertility treatments
Their dedicated doctors, embryologists, nurses and support teams work together to provide appropriate fertility treatment for every client.

The Fertility Partnership
Offering a network of clinics across the UK
Internationally renowned clinicians and award-winning staff in nine clinics, with more on the way.
What’s covered and what isn’t?

Covered

- Investigations and diagnosis; medically necessary blood tests and appropriate investigations
- Treatment; evidence-based treatment – medications and treatment undertaken to assist fertility, for example IVF and IUI

Not covered

- Overseas treatment or support (UK only benefit)
- Surrogacy
- Reversal of voluntary sterilisation for infertility

Egg freezing

To preserve fertility for those going through cancer treatment, there is the option of egg freezing. This option can be made available for all on your company scheme as standard for an additional cost.
