

My Genomic Health

Introducing Medication Check

for your personal and small
business clients

Ready to give your clients safer, more effective treatment?

One simple DNA test is all it takes to help your clients take control of their long-term health.

Our Medication Check is worth £225 – but from 8 June 2026, we’re adding it to all personal and small business policies for new and renewing clients at no extra cost.

It’s just the start of Personalised Health by Bupa: our commitment to groundbreaking preventive care.

What is a Medication Check?

It’s an at-home DNA test that analyses their unique response to over 100 wide-ranging medicines.

So if your clients take medicine for a long-term health concern – like pain relief, cardiovascular disease, or a mental health condition – we could help them find one that’s safer and more effective.

How it helps

One simple test

A speedy DNA sample is all it takes for your clients to unlock the answers in their bodies. The test is quick and easy to order through the My Bupa app.

Clear results

With a full report of our findings, your clients can find a prescription that’s truly personal. Plus, if they’d like to talk it all through, access to a digital GP appointment is included.

Included in their cover

Our Medication Check is worth £225, but we’re adding it to your clients’ cover at no extra cost. Because that’s the kind of value they deserve.

How it works

1. Order using My Bupa

Your clients just need to log in to the My Bupa app. We’ll ask a few questions to make sure the test is right for them.

2. Take the test

We’ll send them a DNA test kit in the post. After completion, they should return it using the prepaid packaging.

3. Get the results

Your clients will receive a full report with their results within four weeks.

4. Talk to a GP

If they’d like to talk through their results, your clients can book a digital GP appointment with a Bupa GP.
